Ahgua Tech LLC
55 Stewart Road
Short Hills NJ 07078

Ms. Charters,

On behalf of myself, Millburn Fire Chief Robert Echavarria, and the entire Millburn Fire Department, I would like to thank you for your generous donation of Flame Decon Body Wash and Shampoo for every member of the Millburn Fire Department.

Cancer in the fire service is at an all-time high due to the over 200 chemicals found in smoke and soot particles. On way that firefighters absorb the chemicals is through the skin. In-fact for every 5 degrees increase in body temperature, the body becomes 400 times more absorbent. This is why it is critical for firefighters to take a shower within an hour of returning to the station and by using The Flame Decon Body Wash. The Flame Body Wash uses a series of activated charcoals that helps remove toxins from the body after a fire. This product also can help remove the smoke odor that lingers on a firefighter's body for days.

The Millburn Fire Department looks forward to working more with EAC Business and Ahgua Tech and helping to protect firefighters.

Sincerely

Captain Adam Brenner
Millburn Fire Department
